Kingston School Business Plan – Financial Projections and Costing:

In setting up a private school business, the amount or cost will depend on the approach and scale you want to undertake. If you intend to go big by acquiring a large facility, then you would need a higher amount of capital as you would need to ensure that your employees are taken care of, and that your private school's environment is conducive enough for the students to learn.

This means that the start-up can either be low or high depending on your goals, vision and aspirations for your business.

The materials and equipment that will be used are nearly the same cost everywhere, and any difference in prices would be minimal and can be overlooked. As for the detailed cost analysis for starting a private school business; it might differ in other countries due to the value of their money.

However, this is what it would cost us to start KINGSTON School;

- Office Furniture Cost will - **100000/=**
- Students Furniture Cost will – **320000/=**
- The budget for library will – **75000/=**
- Computer Lab Cost will – **75000/=**
- Advertising Cost will – **250000/=**
- The budget for the payment of salaries for the first three months of operations will - **330000/=**
- Equipping and decorating the classes and office (computers, generator ,stationary , white boards, soft boards, printers, projectors, markers, pens and pencils, telephones, filing cabinets, and electronics) will cost – **150000/=**
- Additional Expenditure such as Business cards, Brushers, Name Plates, Stamps, Fliers, Signage, Adverts and Promotions will cost – **50000/=**

Going by the market survey and feasibility studies conducted, we came to the conclusion that we will need an average of **1350000/=** to start a small scale but standard private school.
